
AMOGH PATEL

Ahmedabad, India

+91 6358858332 amoghjpatel@gmail.com [GitHub](#) [LinkedIn](#)

Professional Summary

Computer Science Engineering student specializing in Artificial Intelligence and Machine Learning with hands-on experience in building AI-powered applications, full-stack web platforms, and intelligent automation systems. Skilled in Python, React, FastAPI, machine learning libraries, and modern web technologies. Passionate about developing scalable AI solutions focused on real-world impact, intelligent diagnostics, and productivity enhancement.

Education

Vellore Institute of Technology, Bhopal <i>B.Tech in Computer Science Engineering (AI & ML)</i>	2024 – 2028
Shanti Asiatic School, Ahmedabad <i>Higher Secondary Education (Class XII)</i>	2023 – 2024
Shanti Asiatic School, Ahmedabad <i>Secondary Education (Class X)</i>	2021 – 2022

Technical Skills

Programming Languages: Python, C++, Java, C, JavaScript
Frontend: HTML5, CSS3, React.js, Next.js, Tailwind CSS, Bootstrap
Backend: Node.js, Express.js, FastAPI, REST APIs
AI / Machine Learning: Pandas, NumPy, Matplotlib, Scikit-learn, Generative AI, RAG Systems
Databases: MongoDB, MySQL, Firebase
Tools & Platforms: Git, GitHub, VS Code, Postman, Vercel, Netlify, GitHub Pages
Core Concepts: Data Structures & Algorithms, Full Stack Development, API Integration, Responsive UI Design

Experience

X-Logic <i>Software Development Intern</i>	May 2026 – Present <i>Ahmedabad, India</i>
- Developed and optimized web-based applications using HTML, CSS, JavaScript, and Python. - Implemented UI enhancements, debugging workflows, and feature integrations to improve application usability and performance. - Collaborated on frontend and backend development tasks while maintaining responsive and scalable interfaces.	

Projects

ResolveX Intelligence <i>Python, FastAPI, React, Gemini AI, RAG</i>	GitHub
- Built an AI-powered biomedical troubleshooting assistant designed to assist engineers in diagnosing medical equipment issues using intelligent voice interactions and AI diagnostics. - Implemented Retrieval-Augmented Generation (RAG) pipelines for contextual manual intelligence and structured corrective recommendations. - Integrated live AI response streaming, confidence-based diagnostics, and voice-enabled engineering workflows. - Designed a modern diagnostic dashboard to improve troubleshooting efficiency and reduce equipment downtime.	
SkyTrack: Smart Atmospheric Intelligence Web App <i>HTML, CSS, JavaScript, WeatherAPI</i>	GitHub
- Developed a responsive weather intelligence dashboard with real-time atmospheric analytics and geolocation-based forecasting. - Implemented interactive HTML5 Canvas visualizations for hourly weather trends and dynamic forecasting. - Integrated air quality monitoring, UV index analysis, persistent city storage, and mobile-first UI optimization.	
Finly - Expense Tracker Dashboard <i>HTML, CSS, JavaScript</i>	GitHub
- Created a lightweight finance management web application for tracking daily income and expenses. - Designed an intuitive dashboard interface for financial analysis and transaction management. - Implemented responsive layouts and local data handling for seamless user experience.	

Certifications

- [Applied Machine Learning in Python — Coursera](#)
- [Generative AI for Beginners — Udemy](#)
- [The Complete Full Stack Web Developer Course — Udemy](#)
- [Beginning C++ Programming: From Beginner to Beyond — Udemy](#)

Additional Information

- Passionate about Artificial Intelligence, Machine Learning, and AI-driven product development.
- Strong interest in building scalable AI systems focused on automation, diagnostics, and intelligent productivity tools.
- Actively developing full-stack and AI-integrated real-world applications.
